

Spring Cleaning the Natural Way

(NewsUSA) - It's that time of the year again. You have cleaned the counters, emptied the closets and are ready to begin washing away the winter. But this year you can wipe away the grime without adding harmful chemicals to your home.

A new countertop device, the lotus Sanitizing System, utilizes ozone [technology](#) to provide a safe, effective and chemical-free way to kill nearly all of the germs and bacteria commonly found around the house.

Most homeowners associate cleanliness with the scents of household [cleaning](#) products, such as [cleaning](#) fluids, carpet cleaners, air fresheners and window cleaners. However, harsh chemicals contained in these products are actually the source of these scents.

So what you believe to be the fresh smell of a clean [home](#) could actually be harming you and your family. Because the lotus Sanitizing System creates a [cleaning](#) agent by infusing everyday tap water with ozone, there are no smells or fragrances. This indicates that the substance is pure and safe.

Many people are still unfamiliar with the sanitizing benefits of ozone. This naturally occurring molecule is produced to help clean and protect the environment.

The lotus Sanitizing System super-oxygenates regular household tap water by infusing it with ozone, creating an all-natural [cleaning](#) agent. Fifteen minutes after the water has been super-oxygenated, the compound starts to break down and return to its natural state of water, just as it would in the environment.

Used in conjunction with lotus Washable Cleaning Cloths, it is a strong, safe and effective chemical-free sanitizing solution for the home.

Even though this [cleaning](#) agent begins and ends as water, its effectiveness is unsurpassed.

"Ozone is 50 percent more powerful and over 3,000 times faster acting than chlorine bleach," says Gary Rodrick, a professor at the University of Florida and an expert in ozone technology. "Super-oxygenated water is therefore able to efficiently and effectively sanitize everyday household items in the safest way possible."
